Antarctic Research Trust Habitat Restoration Grants

ART grants for habitat restoration projects are for individuals interested in restoring and creating areas of native habitats for the benefit of people, wildlife and plants on islands that are ungrazed by livestock.

Grants are available for

- purchase of commercially grown native plants
- labour required for planting native plants

Grants are awarded on the understanding that the works for which the funding has been approved will be completed within 12 months from the date of signing, that the restoration areas are located on islands without livestock, that they will not be grazed, and that they will be managed for the benefit of people, wildlife and native plants.

Payments will be made on completion of the project, and on submission of an invoice to the ART accompanied by receipts and a report about the work completed.

Applicants are encouraged to discuss their projects with ART trustee Sally Poncet by phone 21826/52826 or email sallyponcet@horizon.co.fk.
