

FALKLAND ISLANDS GOVERNMENT

NOTICE TO MARINERS

Nº 04/2026

Stanley Harbour

Dredging Operations

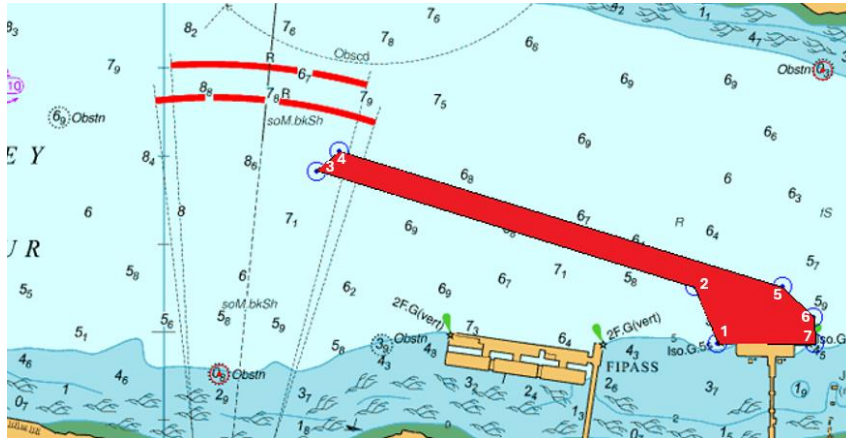

Energy Dock Facility Channel and Berthing Pocket Dredging

1. Dredging operations will commence from Monday 5th October for approximately three months to create a deeper approach channel to the Energy Dock Facility and (previously known as the Temporary Dock Facility) and a berthing pocket.
2. This will be conducted by the Jack-up barge ABEKO SERVER 3 using a long reach excavator loading into 2 split hopper barges which will then be towed out by the tug AFON ALAW to a spoil dumping ground approximately 6 nautical miles east of Mengeary Point.
3. All vessels are requested to pass at slow speed and minimum wash whilst dredging operations are taking place, and to give the AFON ALAW and their tow a wide berth during towing operations.
4. Tug and barge movements to and from the ABEKO SERVER 3 will be broadcast by Stanley Port Control on VHF channel 10.
5. Weather permitting, dredging operations will take place daily from 0600 -1800 until completion.
6. Chartlets of the dredge area and spoil ground are shown below with their respective co-ordinates.

This notice will remain in force for the duration of dredging operations

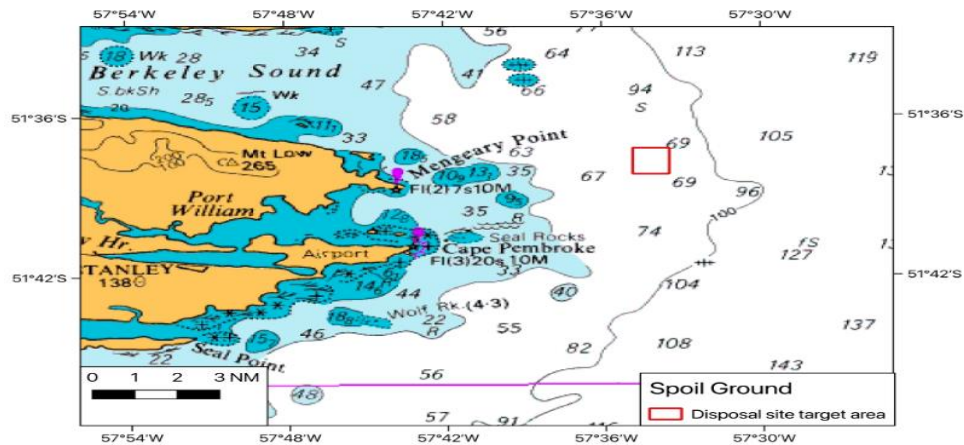

Dredge area is a box bounded by the following co-ordinates:

1. 51°41.512'S 057°48.987'W
2. 51°41.447'S 057°49.029'W
3. 51°41.317'S 057°49.720'W
4. 51°41.294'S 057°49.680'W
5. 51°41.448'S 057°48.869'W
6. 51°41.483'S 057°48.812'W
7. 51°41.512'S 057°48.809'W

Spoil Ground in a box bounded by the following co-ordinates:

8. 51°38.204'S 057°34.878'W
9. 51°37.233'S 057°34.866'W
10. 51°38.240'S 057°33.479'W
11. 51°38.211'S 057°33.491'W

Steuart Barlow MNI
Harbour Master,
Falkland Islands Government.
